NITHISH KUMAR B

+91 9444574206 | nithishkumar27052005@gmail.com | github.com/nithishkumar2704 | Kanchipuram, Tamil Nadu

PROFESSIONAL SUMMARY

Computer Science and Business Systems graduate (2026) with hands-on experience building backend applications using Java, Spring Boot, and SQL databases. Experienced across the **SDLC** through internship and project work, including **REST API development, LLM Integration, system testing**, and **Agile workflows**. Seeking to contribute to reliable, scalable customer-centric software systems in a high-impact engineering environment.

TECHNICAL SKILLS

Languages	Java, SQL
Backend	Spring Boot, Spring Security, Spring Data JPA (Hibernate), REST APIs
Databases	PostgreSQL, MySQL, MongoDB
Engineering	Data Structures & Algorithms, OOP, SDLC, Agile
Tools	Git, Postman, IntelliJ IDEA, n8n

PROFESSIONAL EXPERIENCE

Software Engineering Intern **July 2024 – August 2024**

Arnik Technologies

- Contributed to end-to-end SDLC activities by implementing and testing **5+ software modules** focusing on **data validation and user authentication services**
- Integrated **2 key** third-party services (**Email/SMS notifications and Geolocation APIs**) into existing systems, reducing manual processing
- Identified and resolved **10+ high-priority defects** related to **API response timeouts and UI rendering consistency**, improving application stability
- Collaborated using Git-based workflows and sprint planning, gaining exposure to real-world production practices

PROJECT EXPERIENCE

Payment Processing System **Backend Developer**

Java 21, Spring Boot 3.2, Apache Kafka, Redis, PostgreSQL, Resilience4j, Hibernate JPA, Docker

- Built a distributed payment processor handling **1M+ daily transactions** using Spring Boot, Kafka, Redis, and PostgreSQL
- Implemented **Saga orchestration** for reliable distributed fund transfers
- Solved dual-write issues using the **Transactional Outbox** pattern
- Added Resilience4j circuit breakers for fault tolerance and graceful degradation

Byte Cycle **Backend Developer**

Spring Boot, Spring Security, Spring Data JPA (Hibernate), PostgreSQL, REST APIs

- Built a backend system enabling real-time coordination between food donors and recipients, addressing urban food waste
- Designed and implemented **8+ secure RESTful APIs** covering **user authorization, food donation management,** and **booking workflows**
- Integrated Spring Security with **JWT authentication** to secure APIs and manage role – based access (donor/receiver)

Service Locator **Backend Developer**

Spring Boot, PostgreSQL, REST APIs

- Built a backend system connecting users with verified local service providers using Spring Boot
- Optimized PostgreSQL queries for **provider search and location filtering**, reducing response latency by **20%**
- Designed scalable layered backend architecture

AI Resume Analyzer & Optimizer **Backend Developer (GenAI Integration)**

n8n, LLM APIs, prompt Engineering, Workflow Automation

- Built an **LLM-based workflow** to analyze resume and job description alignment and generate a matching score
- Identified missing keywords and generated improved resume content based on job requirements

EDUCATION

B.Tech - Computer Science and Business Systems **2022 – 2026**

Rajalakshmi Institute of Technology | CGPA: 7.87

SOFT SKILLS

- **Collaboration:** Proven ability to work effectively in team settings during internships/hackathons
- **Problem Solving:** Strong analytical skills applied to data structures and debugging
